QUESTION 7

To maintain end-to-end reporting context, when an agent transfers a call to another ICM Skill Group, to which Cisco Unified Communications Manager configuration object should the call be transferred?

A.   route pattern
B.   agent IP phone
C.   CTI route point
D.   translation pattern
E.   translation route

Answer: C

QUESTION 8

A Cisco Unified Contact Center Enterprise solution is designed with geographic redundancy for the central controllers (with separate call routers and loggers). If Call Router Side A has device majority and its Ethernet private network NIC fails, which two events occur? (Choose two.)

A.   The Call Router Side B stays active, while the Call Router Side A goes idle.
B.   The Call Router Side A stays active, while Call Router Side B goes idle.
C.   There is no ability to make ICM configuration changes.
D.   Both sides go out of service for small period of time, Call Router Side A goes active, and Call Router Side B goes idle.
E.   The system operates as it did prior to failure.

Answer: BC

QUESTION 9

Which failure scenario in the Cisco Unified Contact Center Enterprise solution stops all processing and routing of contact center calls?

A.   ICM Call Router Side A fails at the same time that ICM Logger Side A fails.
B.   ICM Call Router Side A fails at the same time that ICM Logger Side B fails.
C.   ICM Call Router Side B fails at the same time that ICM Logger Side A fails.
D.   ICM Call Router Side B fails at the same time that ICM Logger Side B fails.
E.   ICM Call Router Side A fails at the same time that ICM Call Router Side B fails.
F.   ICM Logger Side A fails at the same time that ICM Logger Side B fails.

Answer: E

QUESTION 10

Which two statements about the Cisco Unified Contact Center Enterprise clustering over the WAN deployment model are true? (Choose two.)

A.   With Cisco Unified Computing System C-Series Servers, you must deploy dual SAN on each data center.
B.   The visible network that supports the communication between Cisco Unified Communications Manager subscriber nodes must be highly available and designed with no single point of failure.
C.   Agents at remote locations must be registered to only one data center for their Cisco Unified IP Phone connections if they are using Cisco Finesse.
D.   Cisco Unified Contact Center Enterprise IVR Peripheral Gateway cannot be split between the data center locations to maintain a local JTAPI connection for call control.
E.   Cisco Unified Communications Manager Peripheral Gateways that are split between the two data centers can share the same private network connection as the central controller (router and logger) components.

Answer: BE

QUESTION 11

Which three statements about QoS in a Cisco Unified Intelligent Contact Management solution are true? (Choose three.)

A.   In a Cisco Unified Intelligent Contact Management network, if the traffic is marked in the ICM, QoS trust needs to be enabled on access-layer routers and switches.

B.   The high priority queue for the private network should be granted 90 percent of total available bandwidth.

C.   The high priority queue for the private network should be granted 75 percent of total available bandwidth.

D.   The high priority queue for the private network should be granted 65 percent of total available bandwidth.

E.   Traffic marking in Cisco Unified ICM means that configuring separate private high and private medium/low sets of IP addresses is no longer necessary.

F.   Traffic marking in Cisco Unified ICM means that configuring separate private high and private medium/low sets of IP addresses is still necessary.

Answer: ABE

QUESTION 12

Under which circumstances can the visible and private networks be converged in the Cisco Unified Contact Center Enterprise system?

A.   when QoS is enabled on both networks

B.   in cases in which there is gigabit bandwidth between sites

C.   under no circumstances

D.   when the Cisco Catalyst switch has dual power supplies

Answer: C
