

## PassLeader 700-702 Exam Dumps Collection with VCE and PDF (Question 21 - Question 24)

New 700-702 exam questions from PassLeader 700-702 dumps! Welcome to download the newest PassLeader 700-702 VCE and PDF dumps: <https://www.passleader.com/700-702.html> (60 Q&As) P.S. Free 700-702 dumps are available on Google Drive shared by PassLeader: [https://drive.google.com/open?id=0B-ob6L\\_QjGLpcDV3aXh6SE1JLW8](https://drive.google.com/open?id=0B-ob6L_QjGLpcDV3aXh6SE1JLW8) QUESTION 21 Which three encapsulations are normalized by the Cisco ACI fabric? (Choose three.) A. HTTPB. MPLSC. VLAN. NVGREE. VxLANF. GREG. STTH. IPsec Answer: CDEExplanation:

[http://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/aci-fundamentals/b\\_ACI-Fundamentals/b\\_ACI\\_Fundamentals\\_BigBook\\_chapter\\_0100.html#concept\\_713CA5790FCA40C48564D5BB19640602](http://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/aci-fundamentals/b_ACI-Fundamentals/b_ACI_Fundamentals_BigBook_chapter_0100.html#concept_713CA5790FCA40C48564D5BB19640602) QUESTION 22 Which customer

requirement is supported by the Cisco Application Centric Infrastructure? A. Storage area networkingB. Cisco Data Center InterconnectC. Environments with both virtual and physical workloadsD. ACI licensing charge per virtual machineE.

OpenFlow Answer: C QUESTION 23 Which option determines packet forwarding in an Cisco Application Centric Infrastructure fabric? A. VxLANB. VLANC. IP subnetD. Policy modelE. VRF Answer: A QUESTION 24 In which two ways can the Cisco Application Policy Infrastructure Controller push policies to the leaf nodes? (Choose two.) A. On demand (lazy)B. ImmediateC. StaticD. ProgrammedE. Scheduled Answer: ABExplanation:

<http://www.cisco.com/c/en/us/solutions/collateral/data-center-virtualization/application-centric-infrastructure/white-paper-c11-731961.html> When a virtual endpoint is discovered, the policy is pushed and programmed to the leaf nodes based on resolution

immediacy and instrumentation immediacy, respectively. In both cases, there is an immediate and on-demand (default) option that is defined when the VMM is associated on Cisco APIC. The on-demand option conserves resources and uses the reserved space in the policy content-addressable memory (CAM) when needed.- Resolution ImmediacyThe first option to push a policy is immediately.

All policies (VLAN, NVGRE, and VXLAN), bindings, contracts, and filters are pushed to the leaf node when the hypervisor physical NIC (pFJIC) is attached. With the on-demand option, policies are pushed to the leaf node when the pPJIC and vNIC are attached to the port group (EPG).- Deployment ImmediacyDeployment immediacy defines when the policy is programmed in hardware. If the immediate option is chosen, the policies are programmed in the policy CAM after they are received by Cisco APIC. The on-demand option programs policies in the hardware policy CAM only when reachability is learned through the data path.
